Allowable Subject Matter

1. Claims 1-11 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not disclose a clutch torque correction that is only used up to a preset value of wheel slip and where the torque after the preset value is calculated using the torque value from before the preset value in addition to a second value. The prior art contains many inventions with correction values, but these are used throughout the range of wheel slip values or after a preset threshold, not before.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The drawing objection for not showing every feature of the invention in the claims has been withdrawn. The remaining objections remain. The axis labels need to be corrected and the "correction" label should be clarified by stating it is the correction range. Not the exact value of the correction.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian J. Broadhead whose telephone number is 571-272-6957. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 571-272-6956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
